Sunshine CTF Team

We, the Zigerians, have long sought the formula for concentrated dark matter. Having both abducted and questioned Rick Sanchez and his family we know that engaging Rick directly is highly inadvisable. Last time he blew up our main spacecraft and many of my fellow Zigerians perished. We are hiring you to succeed where we did not - through social engineering Rick's family to get the formula.

We know that Rick is particularly vulnerable to his family and will likely keep the formula written in his safe or in his workshop in the family garage. His daughter and her husband will probably have no idea of its existence, but it is highly likely that either his granddaughter or grandson know or otherwise have access to the formula.

The following are ground rules for this engagement: Scanning, DDoS, or web pentesting are prohibited. We've already tried it. Once you've social engineered your way closer to the family, do not alter evidence you find as we're all a team here and you are not the only team we've hired. Any additional questions should be directed toward the SunshineCTF judges.

Sincerely,

Prince Nebulon
